U.S. Patent and Trademark Office PTO-326 (Rev. 04-01)

## **DETAILED ACTION**

1. Claims 1-12 are pending.

- 2. Based upon Applicant's Remarks filed May 23, 2005, the improper Markush objection, rejections under 35 U.S.C. 102(b) over Brouwer et al and Aguro-Kanesho Co. LTD, and rejections under 35 U.S.C. 112, 2<sup>nd</sup> paragraph are withdrawn.
- 3. Upon further reconsideration, restriction is again required under 35 U.S.C. 121. The inventions are as follows:

Group I: Claims 1-4 and 7, drawn to a chemical compound, pharmaceutical composition, and a process for preparing wherein the compound of formula I, R8 represents –N.

Group II: Claims 1-4 and 7, drawn to a chemical compound, pharmaceutical composition, and a process for preparing wherein the compound of formula I, R8 represents –O.

Group III: Claims 1-4 and 7, drawn to a chemical compound, pharmaceutical composition, and a process for preparing wherein the compound of formula I, R8 represents –N-C(O)-.

Group IV: Claims 5 and 6, drawn to a pharmaceutical composition using a compound of formula I and at least one other active ingredient.

Group V: Claims 8-12, drawn to various methods of using a chemical compound of formula I.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 10/616,959

Art Unit: 1625

Inventions (I-III) and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product. See the various methods claimed.

Inventions (I-III) and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product. At claim 6, see the various active ingredients.

The compounds within the definition of R8 are diverse in scope. A prior art reference which anticipates R8 which represents amino under 35 U.S.C. 102 would not render obvious methoxy under 35 U.S.C 103. Accordingly, the radicals within the definition of R8 are independent and patentable distinct. See Groups I-III.

4. Based upon Applicant's election of November 4, 2004, the species of page 29, Table 1, Example 13, *Group I is the elected invention*. Claims 5, 6 and 8-12 are withdrawn from consideration.

Application/Control Number: 10/616,959

Art Unit: 1625

5. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by

Page 4

a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37

CFR 1.17(h).

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Agro-Kanesho Co., LTD (Reference B03, cited by Applicants).

The instantly claimed compounds are disclosed. At page 450, Table 1, see compounds 1-28. The difference between the prior art compounds and the instantly claimed compounds is the substitution of the phenyl ring.

The prior art reference teaches the equivalence of halogen and alkyl when substituted off the phenyl ring. Based upon the teaching of equivalence, it would have obvious to one of ordinary skill to substitute one radical for another radical such as CI, Br or methyl. Accordingly, the compounds are deemed obvious modifications therefrom.

Application/Control Number: 10/616,959

Art Unit: 1625

8. Claims 3, 4, and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of

the base claim and any intervening claims.

9. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Zinna N. Davis whose telephone number is 571-272-

0682.

10. Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free).
